

Double belt grinders for industry - KEF B0 50/8

Item Number: 1022360

KEF professional heavy double industrial grinders

B0 is characterized by a simple but strong stable construction. The great distance between grinding arms makes these machines very suitable for grinding of curved issues. The machines are available with one and two speed and can be fitted with an abrasive band on one side and polishing belt on the other side.

The B0 machines have a low noise level both mechanical and electrical. B0 machines are prepared for connection to the central dust extraction system or the can be supplied with a complete dust exhaust unit.

The solidly dimensioned wheel guards and flanges with all current safety requirements. Adjustable spark arresters and eye shields are supplied as standard equipment.

Can be delivered with VFCB 220 exhaust and as table model.

Accessories: Pedestal • Working table with water cup • complete extraction units •

Product Specifications

Bench model	✓
Without exhaust	✓
Grinding belt (mm)	50x1600
Machine height (mm)	890
Machine length (mm)	560
Machine width (mm)	480
Motor (kW)	1,4
Net weight (kg)	45
Number of spindle speeds	1
Rpm	1400

Voltage

3x400/440V-50/60 Hz

Wheel size, Contact wheel (ø mm)

200x50x20
