

Double belt grinders for industry - KEF B0 75/10

Item Number: 1022119

KEF professional heavy double industrial grinders

B0 is characterized by a simple but strong stable construction. The great distance between grinding arms makes these machines very suitable for grinding of curved issues. The machines are available with one and two speed and can be fitted with an abrasive band on one side and polishing belt on the other side.

The B0 machines have a low noise level both mechanical and electrical. B0 machines are prepared for connection to the central dust extraction system or the can be supplied with a complete dust exhaust unit.

The solidly dimensioned wheel guards and flanges with all current safety requirements. Adjustable spark arresters and eye shields are supplied as standard equipment.

Can be delivered with VFCB 220 exhaust and as table model.

Accessories: Pedestal • Working table with water cup • complete extraction units •

Product Specifications

Bench model	✓
Without exhaust	✓
Grinding belt (mm)	75x2000
Machine height (mm)	1200
Machine length (mm)	1150
Machine width (mm)	550
Motor (kW)	2,0
Net weight (kg)	120
Number of spindle speeds	1
Rpm	1400

Voltage	3x400/440V-50/60 Hz
Wheel size, Contact wheel (ø mm)	250x75X32
